

Maritime Drone Demo Day – live at Copenhagen Malmö Port

OCEAN
VALLEY

Location: Prøvestenen, K-Vej, 2300 Copenhagen

Date: April 23rd from 12:00 – 16:00

Curious on how water and subsea drones can support inspection, monitoring and operations in ports and coastal infrastructure?

Copenhagen Malmö Port, Ocean Valley, and OPERATORS Collective invite ports, maritime companies, utilities, infrastructure, and drone owners to a focused live demo afternoon inside Copenhagen's active port environment.

Experience real solutions in action and meet the companies building the next generation of maritime drone technology – from inspection and surveys to security, monitoring and maintenance.

The purpose of the day is to:

- Connect drone owners with potential customers and partners
- Explore drone applications and use-cases live in maritime operations
- Open the port as a future test environment for drone technologies

What to expect?

See maritime drone solutions demonstrated in real port conditions

Explore concrete use cases for your assets and operations

Meet technology providers and peers across the ecosystem

Get early insight into testing and pilot opportunities at CMP

Please note

- Registration is restricted to invited guests.
- Participation is subject to approval. We reserve the right to decline registrations as the event is limited to 50 participants.
- Registration deadline: April 1st.
- Copenhagen Malmö Port is critical infrastructure. Photography is not permitted, and all participants must register in advance.

Program Overview

12:00 Welcome and opening remarks

Accelerate drone innovation through demonstration environments in the port of Copenhagen

12:30 – 15:00 Live Drone Demonstrations

4–5 drone operators present and demonstrate their technologies live in the port environment

15:00 – 16:00 Seaside dialogue

Networking session in the old Fire Station at Prøvestenen where drone operators exhibit technologies on land and participants can discuss solutions up close.

Opening the Port – Accelerating Maritime Innovation through Testbeds and Demonstration Environments
